

TRAINING SCHEDULE

Venue:

Date:

Day One – Morning Session

| TIME | TRAINING SESSIONS | DESCRIPTION |
|-----------|--|--|
| (60 mins) | New concept and The SpineCor System | Multimedia presentation of Dr. Coillard's etiopathogenic concept of idiopathic scoliosis and basic principles of scoliosis treatment with the SpineCor System. |
| (30 mins) | SpineCor Concept | Overview of the SpineCor treatment concept |
| (15 mins) | Coffee Break | |
| (15 mins) | Clinical evaluation | Review of the key elements of the clinical exam. |
| (15 mins) | X-ray evaluation | Review of the key elements for the evaluation of the x-rays. |
| (60 mins) | New radiological classification | Radiological characteristics of each class and sub-class of scoliosis patients. |
| (60 mins) | Lunch Break | |

Day One – Afternoon Session

| <i>TIME</i> | <i>TRAINING SESSIONS</i> | <i>DESCRIPTION</i> |
|-------------|---|---|
| (60 mins) | Corrective Movements & Brace Fitting | Individual corrective movements, class specific corrective movements with video demonstration. How to correctly apply the pelvic base, thigh & crotch bands for maximum stability. Correct positioning of the bolero. Class specific corrective band configurations. |
| (45 mins) | SpineCor Assistant Software (3.0 version) | Role of the SAS in SpineCor treatment. Simulation of a new patient visit, file creation, data entry, clinical parameters classification, brace fitting & follow up instructions. Recording patient, brace & prescription details. File storage, retrieval, printing & transfer. Scoliosis resources & Free Point options. |
| (15 mins) | Coffee Break | |
| (60 mins) | Physiotherapy program in the SpineCor Treatment | Role of the physiotherapy treatment to complement the action of the brace and reinforce the principles of the treatment with SpineCor. |
| (30 mins) | Treatment Protocols Patient approach and Follow-up | Patient education. SpineCor treatment, x-ray & weaning protocols. |
| (30 mins) | Multiple Choice Questions | Examination with Open Book policy. |

Day Two – Morning Session

| TIME | TRAINING SESSIONS | DESCRIPTION |
|------------|--|---|
| (90 mins) | SpineCor Classification (Practical Exercise) | Classification of example patients using brief history, x-rays and photographs. Each delegate to practice manual classification of five example patients. Session to be supported by trainers who will provide guidance to delegates but not give answers. Individuals will be marked on each classification chosen. |
| (20 mins) | Coffee Break | |
| (100 mins) | SAS Software (Practical Exercise) | <p>Software practice using the same five example patients from the classification session. Tasks to include:</p> <ul style="list-style-type: none"> - Creation of new patient file - Selection of examinations for initial visit - Add/subtract examinations within a visit - Access and make data entries in the general information fields - Clinical examination data entry - Radiological examination data entry - Classification parameter questions data entry - Classification : class selection/acceptance - Brace fitting instructions - Corrective movement video's - With brace examinations, clinical and radiological data. - Brace fitting record data entry - Prescription filling - Save file - File retrieval - Print patient brace fitting instructions - Print one or more patient visit information - Erase files/visits <p>(Trainers will give guidance to delegates but will also appraise their ability to navigate the software, access files, information and features.)</p> |
| (60 mins) | Lunch Break | |

Day Two – Afternoon Session

| TIME | TRAINING SESSIONS | DESCRIPTION |
|------------|--|--|
| (60 mins) | Brace Fittings & Corrective Movement With Model (Practical Exercise) | Demonstration of five different classification corrective movements and appropriate brace fittings. Including: <ul style="list-style-type: none"> - Standard pelvic base fitting - Standard bolero fitting - Corrective movement and band fittings for: <ul style="list-style-type: none"> RT Thoracic Type I RT Thoracic Type III RT Thoracic LT Lumbar Type III LT Thoracolumbar Type I LT Lumbar |
| (45 mins) | Brace Fittings & Corrective Movement With Model (Practical Exercise) | Delegates to fit models with SpineCor braces from the five different classifications demonstrated. |
| (15 mins) | Coffee Break | |
| (105 mins) | Practical Exercise | Delegate fitting models continued. Trainers will critique and score each delegates patient fitting. |
| (15 mins) | Discussion Forum | |
